WORKFORCE DEVELOPMENT AND LIFELONG LEARNING—

SUMMER 2024
13-Week Session
At **NO COST** for DC residents.

Create your own APP!

iOS Application Development

LIMITED SEATING

Students must have iPad to enroll

Course Overview:

This one semester, 75-hour course is geared to assist students in building a robust framework in the Swift programming language. In this course, students get practical experience with the tools, platform, techniques, and concepts needed to build a basic iOS application/App. In this App design course work, students are guided through the app design process, which includes brainstorming, storyboarding, project planning, creating a prototype, and evaluating an app of their own. Although students may not yet have the skills to create a functioning app, the work they put into their app prototypes sets them up for future app development ideas to eventual actualization of a well-functioning app.
